- 1 With the issue published today, JIPITEC opens the 16th annual volume since its foundation in 2010. The issue brings together contributions from authors from various regions of Europe, from the Baltic States, Eastern and Central Europe to Italy and Portugal, thus demonstrating the truly European claim of the journal. The six articles have undergone a rigorous double-blind peer review process, with 18 further submissions rejected. This demonstrates the journal's high quality standards. The topics of the issue range from various aspects of the regulation of artificial intelligence (articles by Nuno Sousa e Silva, Mateus Correia de Carvalho and Stepanka Havlikova), to the legal coverage of health apps (Liga Svempe), to the Cyber Resilience Act and Open Source (Mattis van 't Schip) and to the regulation of push notifications under data protection law (Tristan Radtke). The issue closes with an Opinion of the European Copyright Society on Copyright and Generative AI. We hope you find this JIPITEC issue a stimulating read and invite you to submit manuscripts for the next issues!
